SUMMARY

Senior Quality Assurance, Manufacturing, and Supply Chain Leader with over 20 years of progressive experience across automotive, electronics, EMS, EV, and regulated manufacturing environments. Certified QMS Lead Auditor and IECEx / ATEX Authorized Person, providing strategic and hands-on leadership in IECEx, ATEX, ISO 9001, IATF 16949, and customer-specific compliance frameworks. Demonstrated expertise in enterprise-wide quality governance, spanning manufacturing quality, supplier and procurement quality, supply chain assurance, customer quality, warranty management, and sales returns. Proven ability to stabilize production operations, strengthen supplier performance, mitigate quality risks, and embed preventive quality systems, supporting NPD / NPI and sustained operational excellence.

SKILLS

- Quality Management Systems – ISO 9001, IATF 16949, IECEx (80079-34)
- Internal, External & Customer Audits
- Manufacturing Quality Assurance & Process Control
- Process Capability, SPC & Control Plans
- Supplier Qualification, Audits & Development
- Incoming Quality Assurance (IQA)
- Root Cause Analysis – 8D, 5-Why, Fishbone
- IECEx / ATEX Manufacturing Compliance & Audits
- CAPA Management & Regulatory Compliance
- APQP, PPAP, NPD / NPI Quality Planning
- Lean Manufacturing & Continuous Improvement,
- Procurement Quality & Vendor Performance Management
- Cost, Quality & Delivery Improvement Initiatives
- DMAIC, FMEA, 7 QC Tools
  Warranty & Field Failure Analysis

EDUCATION

MSc – Procurement & Supply Chain Management -2020 -2021
Robert Gordon University, UK

Bachelor's of Engineering – Electrical and Electronics - 2004-2008
Government College of Technologies, Coimbatore, India

Diploma – Electrical & Electronics Engineering – 1996 -1999
Ramakrishna Polytechnic College, Coimbatore, India

EXPERIENCE

Senior Manager – Quality **June -2023**
VAS Pvt. Ltd.,- Coimbatore (Electronic Manufacturing Service & Wiring Harness Manufacturing)

- Defined and implemented quality vision and strategy aligned with business objectives, contributing to measurable improvements in operational performance and customer satisfaction.
- Led cross-functional quality initiatives across production, engineering, and supply chain, improving First Pass Yield by 6–8% and reducing in-process rejection by approximately 40%.
- Strengthened and streamlined QMS framework, maintaining compliance with ISO, regulatory, and customer audit requirements, achieving zero major non-conformities during external audits.
- Ensured compliance with RoHS, REACH, CE, UL, and customer-specific standards, while improving customer complaint closure time by 30% and sustaining customer PPM below 150.
- Enhanced QMS documentation, procedures, and internal controls, reducing documentation gaps and audit observations by approximately 35% on Every Year.
- Improved key product quality metrics, reducing COPQ from 2.8% to below 1.3% of turnover, delivering significant cost savings.

- Led structured Root Cause Analysis and CAPA initiatives, reducing repeat issues by approximately 40% through preventive action implementation.
- Drove supplier quality development programs, reducing supplier defect rates by 50% and improving supplier OTD performance to above 95%.
- Managed and mentored Quality Assurance and Quality Control teams, fostering a performance-driven culture and strengthening problem-solving capability across departments.
- Acted as primary interface for key customers during audits, escalations, and performance reviews, maintaining strong customer relationships and compliance credibility.
- Collaborated with engineering and manufacturing teams to enhance design-for-quality and process capability, supporting successful NPI and localization initiatives across Asia Pacific operations.
- Supported regionalisation and site-based development projects, ensuring quality governance alignment across global and regional stakeholders.

Manager – Supply Chain Functions **2021 -2023**

Courtyard by Marriott, Inverness,UK

- Managed procurement, supplier coordination, and inventory control.
- Led end-to-end procurement planning, demand forecasting, and supplier coordination to ensure uninterrupted operational supply.
- Implemented structured demand planning based on occupancy trends, event forecasts, and consumption analysis.
- Managed MRP-based replenishment planning for beverage, consumables, and operational supplies.
- Monitored stock levels, consumption patterns, and reorder points to prevent stock-outs and overstocking.
- Maintained inventory accuracy through cycle counts and periodic stock-taking, achieving high stock reconciliation levels.
- Controlled stores operations, including GRN verification, material issuance, FIFO adherence, and wastage reduction.
- Improved supplier performance through delivery tracking, quality monitoring, and service-level compliance reviews.

MSc - Master's in Procurement and Supply Chain Management, Full–time, Aberdeen Business School , U.K 2020 -2021

Completed a full-time Master's programme focused on strategic procurement, global sourcing, and supply chain optimisation. Gained advanced knowledge in demand forecasting, inventory modelling, MRP systems, logistics strategy, and supply chain risk management within international business environments.Developed practical expertise in supplier negotiation strategies, contract management, cost–value analysis, and sustainable procurement frameworks.

The programme strengthened capabilities in data-driven decision-making, supply chain resilience, and alignment of procurement strategy with overall business objectives.

Quality Manager – Manufacturing & Supplier Quality **2018-2019**

LGB (Cold Forge) Ltd., Coimbatore – Forge & Machined Automotive components

- Led end-to-end Manufacturing and Supplier Quality functions for cold-forged and precision-machined automotive component supporting both New Product Development (NPD) and series production programs.
- Directed APQP planning and PPAP submissions for OEM and Tier-1 customers, ensuring successful approvals and smooth production ramp-up without major quality escalations.
- Established process control plans, PFMEA, and capability monitoring systems, achieving Cp/Cpk >1.33 on critical-to-quality characteristics across key product lines.
- Reduced in-process rejection by approximately **35%** through structured root cause analysis and poka-yoke And quality gates are installed.
- Strengthened incoming inspection protocols and supplier quality monitoring dashboards to ensure consistent raw material and component quality.
- Managed customer audits, line trials, and containment actions, maintaining strong OEM relationships and sustaining customer PPM below **200 PPM**.

Senior Engineer – Quality Engineering **2000-2018**

Pricol Limited, Coimbatore – Automotive Electronic Instruments
(18 Years | Career progression from Inspector to Senior Engineer)

- Progressed through quality roles over 18 years within automotive electronics manufacturing, supporting OEM instrument cluster and control device programs.
- Led customer quality interface for OEM accounts, maintaining customer PPM below **200 PPM** and supporting smooth new product launches with controlled quality ramp-up.
- Managed Incoming Quality Assurance (IQA) for electronic PCBs, machined components, and assemblies, reducing incoming defects by approximately **35%** through supplier corrective action and development initiatives.
- Applied SPC, MSA, 8D, and structured root cause methodologies, improving First Pass Yield by **5–6%** and reducing repeat defects by around **30%**.
- Analysed warranty trends and field returns, driving corrective actions that reduced repeat field complaints by approximately **25%**.
- Collaborated with procurement and global sourcing teams on supplier evaluation, technical negotiations, and cost–quality optimisation discussions, strengthening supplier performance and delivery reliability.
- Supported international supplier interactions, contributing to supplier audits, performance reviews, and improvement roadmaps aligned with automotive supply chain strategy.
- Actively participated in IATF-aligned audits, layered process audits, and customer line audits, maintaining strong compliance performance.

ACCOMPLISHMENTS

- Sustained ISO 9001 & IATF 16949 compliance
- Supported IECEx / ATEX manufacturing compliance
- Drove defect reduction and process stabilisation
- Strengthened supplier quality performance
- Enabled successful new product launches
- Reduced warranty and field failure issues

CERTIFICATIONS

- Certified QMS Lead Auditor
- Certified IECEx & ATEX Manufacturing Process Auditor / Authorized Person
- Lean Six Sigma Green Belt
- Certified GHG Validator (ISO 14064 / 14067)
- Power BI – Data Visualisation
- APM Project Management (PMQ)
- SAP HANA MM Training
- Data analysis and Visualisation
